

## Additional Support Services:

### Telehealth Staffing

Virtual staffing for your RPM program (and staffing gaps) via VSee's medical group – This American Doc

### Medical Billing

Expert billing team with advanced tools for higher claims acceptance and faster reimbursements.

### Device Logistics & Program Management

We do the technology heavy lifting with device set up, pairing, lock down, returns, cleaning, and project management.

### Remote Patient Monitoring

Customizable app and APIs for device agnostic integration of blood pressure cuffs, digital scales, glucometers, pulse oximeters...)

### Hospital at Home

Highly experienced innovation partner and telehealth platform for intensive home care programs. Integrate continuous monitoring devices and AI analytics.

### Remote Physical Exams

Live stream devices and faces for an in-person like experience with digital otoscope, stethoscope, dermatoscope, EKG, PTZ cameras, etc. – Available as stand-alone software or with telemedicine carts and kits.

# VSee Telehealth

## Remote Patient Monitoring Solutions

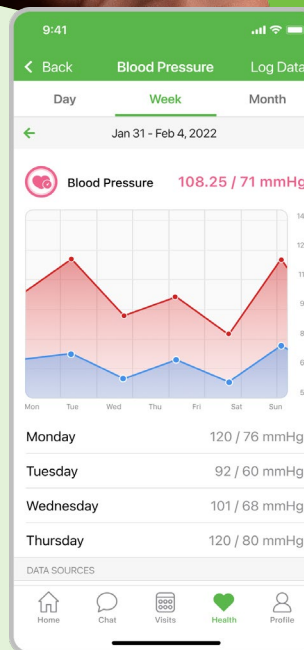

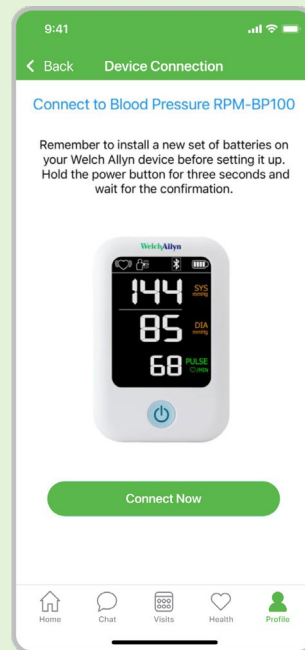

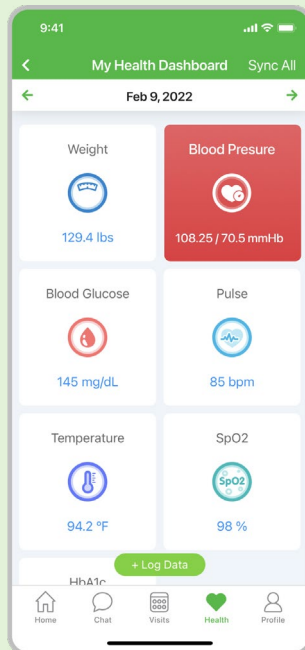

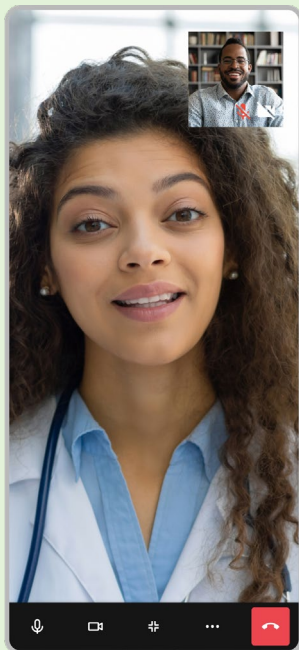

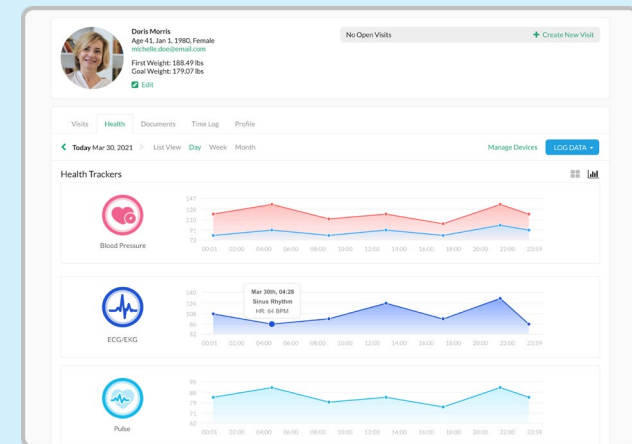

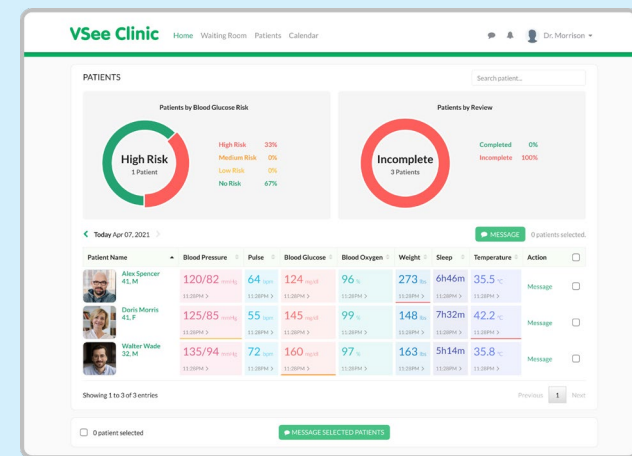

Integrate your choice of devices and speedily customize your own RPM app with VSee's no code, low code telehealth platform.

# Configurable, White-Label RPM & Telehealth App

## Create Your Patient Experience

- Easily connect and track multiple medical devices and wearables
- Allow self-schedule and walk-in video visits
- Get simple omni-channel communications – chat, voice, video, email
- Quickly customize apps to my use case – post-acute care, chronic care, clinical trials, lifestyle health, etc.

## Enable Efficient Provider Monitoring

- Custom set risk ranges and alerts for all incoming data
- Group and view patients by alert levels
- Notice trends and discrepancies via multi-view data visualizations
- Automatically track time for reimbursements
- Simplify email, chat, voice, and video visit escalation with unified omni-channel communication
