Covid-19 Solutions

Ready-to-go Telehealth to Combat Covid and Beyond

Get Agility to Pivot with Market Demands

As Covid surges come and go, you need to make sure you continue to meet your business goals. VSee's comprehensive telehealth platform gives you the versatility to expand your current Covid testing capacity as well as to take advantage of telehealth opportunities going forward. Whether you're looking to automate your telehealth billing backend or to start offering virtual primary care services, VSee offers the solutions you need to go-to-market fast.

Ready-To-Deploy VSee Covid Response Solutions

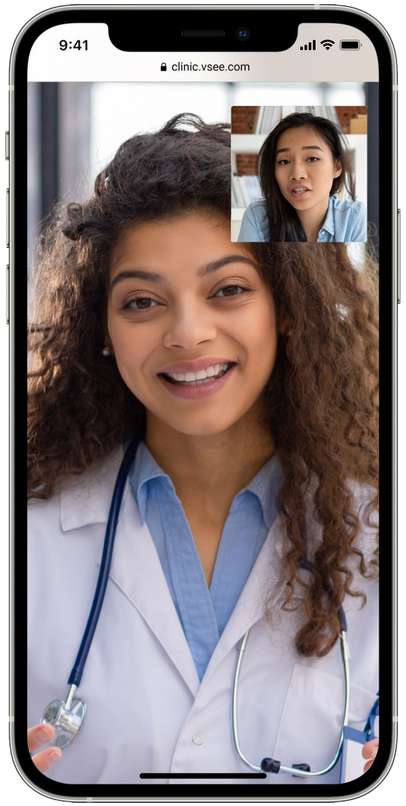

Scale Mass Covid Test Proctoring

Get a custom branded home test portal where patients can call-in and have a proctor monitor the patient for quality assurance during a 15 min Antigen Home Test or 5 Min PCR Test. Simply connect patients and proctors for compliant Covid testing in the home, school, office, or facility.

Feature Highlights:

- On-Demand / Scheduled Test Monitoring Consults
- Secure, HIPAA-compliant video + chat
- Streamlined front desk with consent, eligibility, payment
- Provider / Proctor Staffing via VSee medical group TAD

Ready-To-Deploy VSee Covid Response Solutions

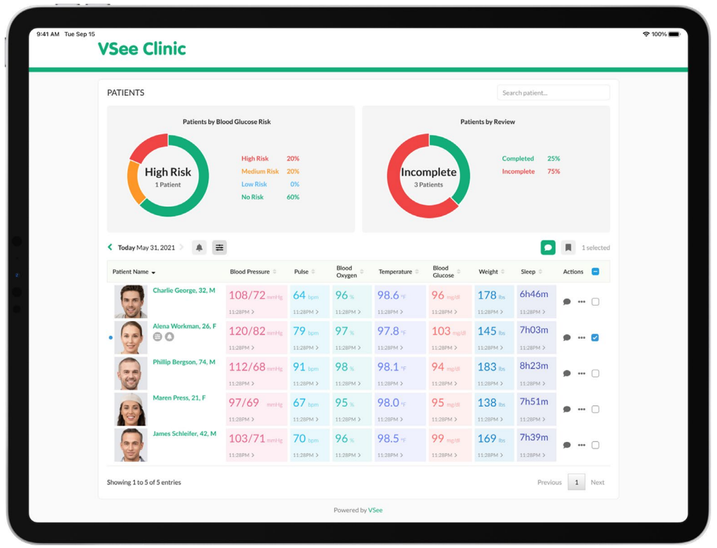

Expand Covid Services with a Treatment Portal for Walk-ins and Follow-up Appointments

Make it simple for Covid Positive Patients to get follow-up and walk-in primary care with a custom branded treatment portal and/or mobile app. Embed the portal on your website. Manage hundreds of clinician schedules in the backend for 24/7 virtual primary care visits.

Feature Highlights:

- Walk-In or Scheduled Consults with appointment reminders
- Streamlined front desk with consent, eligibility, payment
- Guest Invite Appointment Link
- e-Prescription to preferred pharmacy
- Provider/Physician Staffing via VSee medical group TAD

Ready-To-Deploy VSee Covid Response Solutions

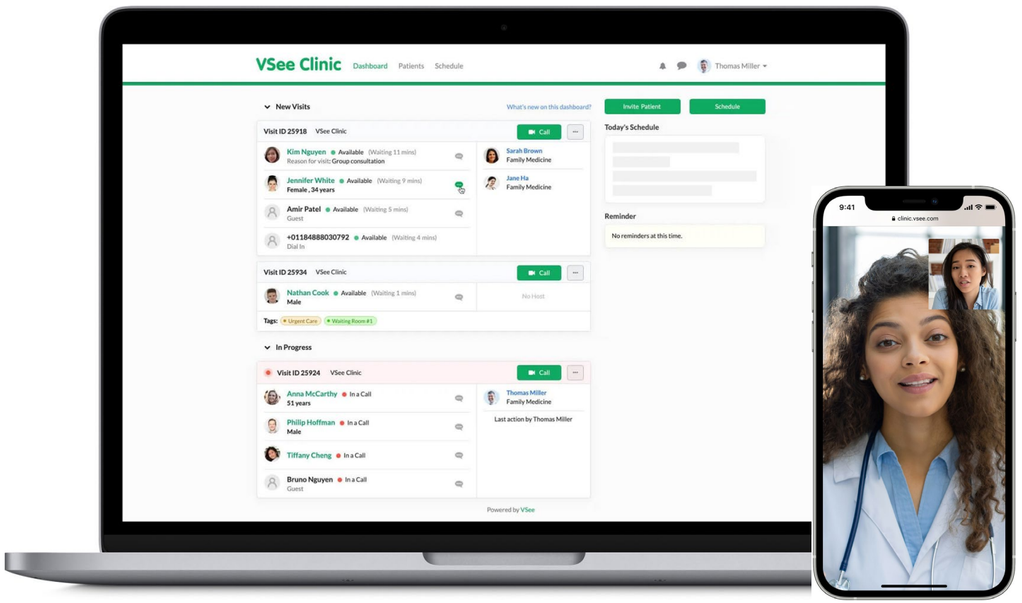

Launch Remote Patient Monitoring for Long Covid

Care team members can easily track Long Covid patients' real-time biometric data from a health data dashboard. Patients are automatically grouped by custom health levels for fast scanning. Instantly escalate to an on-demand or scheduled video visit.

Feature Highlights:

- Customize risk ranges and receive automatic alerts for "out of range" readings
- Auto sync with wellness devices (blood pressure cuff, pulse oximeter, digital scale, glucometer, temperature, etc.)
- Instantly escalate to an on-demand or scheduled video visit
- Provider / Physician Staffing via VSee medical group TAD

What’s After Covid?

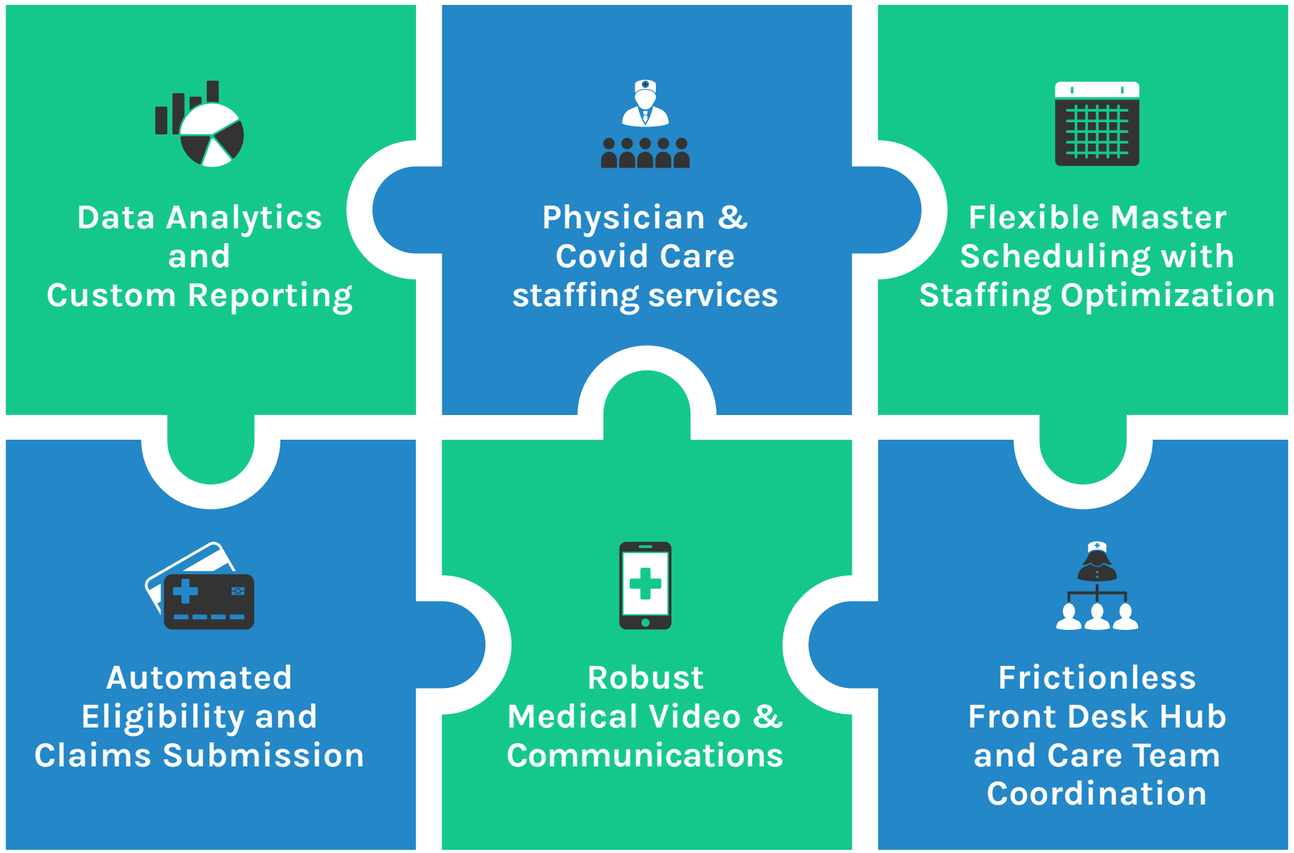

Maximize Opportunities in Virtual Primary Care, Remote Patient Monitoring, and more!

Built for configurability, the VSee platform gives you flexibility to tailor the platform to your needs so you can optimize workflows and maximize your ROI.

- Customizable, white-label telehealth platform
- On/off feature blocks (e.g. scheduling, communications, billing, front desk hub, video, etc.)
- Rich APIs and SDKs for even more tailored integrations
- Physician and provider staffing via VSee medical group

The Building Blocks to Expand Your Covid Services

VSee's comprehensive telehealth platform stands on over 12 years of telehealth design and engineering expertise to give you one of the most extensive feature sets to work with. Choose only what you need to fill in functionality gaps and streamline broken workflows. Feature set highlights below:

Empowering Customers To Deliver Agile Covid Responses

Serving Our Veterans with Timely Mental Health Care

Supporting the VA with mental health provider staffing, scheduling, and claims submissions

Expanding Employee Covid Care with VSee

Providing a white-label platform to automate eligibility and billing, proctor Covid tests, and push positive cases to a virtual primary care consult

Advancing Covid At-Home Testing and Treatment

Supporting home labs with physician staffing (TAD) and treatment portal for virtual consults with eprescribe

Streamlining Vaccine Tracking & Scheduling

Providing flexible master scheduling to build a vaccine self-scheduler across all provider availability

VSee is the telehealth company behind McKesson, GE, Optum, Trinity, Los Angeles County, NASA Space Station, and 2000+ clients. VSee's comprehensive telehealth platform integrates with the most innovative biosensors, wearable technology, and care administration technologies to lead distance healthcare delivery.
